1955

PRICE 12s. 6d. NET

# PUBLICATION OF THE GENERAL REGISTER OFFICE

## Weekly Return

Infectious diseases in each local area : Births and deaths in Great Towns, distinguishing deaths from certain notifiable diseases: Meteorological report.  
1s. (1s. 1½d.)

## Quarterly Return

Numbers of births (live and still), marriages and deaths (distinguishing infant and neonatal deaths), together with rates in each quarter and year : Quarterly and annual figures of deaths by cause and sex : Vital statistics of certain foreign countries and great Towns : Summaries of corrected notifications of infectious diseases : Changes in boundaries of administrative areas : Numbers of insured persons absent from work owing to sickness or industrial injury : Meteorological report ; Special annual tables of National population estimates (by sex and age and in the Standard Regions and Conurbations), of populations and births and deaths assigned to each County and to the Metropolitan Boroughs, the 160 Great Towns and the 160 Smaller Towns, and of population projections and life tables. 1s. 6d. (1s. 7½d.)

## Statistical Review

The annual presentation and review of the vital statistics of England and Wales.

### Tables volumes :

1952	Part I, Medical	....	....	....	....	10s.	(10s. 5d.)
	Part II, Civil	....	....	....	....	6s.	(6s. 3d.)

1951	Text, (Medical and Civil combined)	10s.	(10s. 5d.)
1952	Text, (Medical and Civil combined)	In preparation	

### Supplements :

1950/1951	Supplement on General Morbidity, Cancer and Mental Health	7s. 6d.	(7s. 9d.)
	Supplement on Hospital In-patient Statistics	8s. 6d.	(8s. 9d.)

## Estimates of the Population of England and Wales

A series of annual publications issued to meet a general demand for up-to-date figures of local populations, containing estimates of the populations of each local government area in England and Wales.

Populations as at 30th June, 1954	9d.	10½d.)
-----------------------------------	-----	--------

## Decennial Supplement

A decennial review of the vital statistics of England and Wales.

1931	Part I Life Tables	3s.	(3s. 2d.)
	Part IIA Occupational Mortality	17s. 6d.	(17s. 10d.)
	Part IIA Occupational Fertility, 1931 and 1939	13s. 6d.	(13s. 10d.)
	Part III Estimates of Population, Statistics of Births, Deaths and Marriages, 1921/1931	70s.	(71s. 3d.)
	Part IV Multiple or Secondary Causes of Death	12s. 6d.	(12s. 10d.)

Prices in brackets include postage.

## EXPLANATORY NOTES

### 1. New or Recent Changes in Presentation

(a) *Standard Regions, Conurbations, Aggregate Summaries by type of area.*

All figures given for regions relate to the Standard Regions whose constitution is set out on page viii.

Six conurbation areas were introduced in 1950 in tables showing Standard Regions. For definition of "conurbation" and the list of conurbations, see Note 13 on page viii.

National aggregate summaries by type of area relate to aggregates of (a) conurbations, and (b) areas outside the conurbations, including separately:—Urban Areas with (i) populations of 100,000 and over, (ii) populations of 50,000 and under 100,000, and (iii) populations under 50,000; and Rural Districts. For this purpose "Urban Areas" includes Boroughs and Urban Districts as defined under the Local Government Acts, and Rural Districts are as defined under those Acts.

(b) *Order of Tables*

The tables were renumbered in 1950 to form the following sequences:—Populations—Tables 1 and 2; Serial mortality records—Tables 3—11; All areas—Table 12; Deaths by age—Tables 13-16; Cause analyses—Tables 17-23; Stillbirths and Infant Mortality—Tables 24-28; Infectious diseases—Tables 29-33; Weather—Tables 34-36. See Table of Contents on page ii.

(c) *Change in Classification*

From 1950 inclusive causes of death are classified according to the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948 (Sixth Revision of the International List)\*.

Rates and indices for earlier years have been adjusted as far as possible to give comparability with those for 1950 and on. See Notes 4, 5 and 6 on pages vi and vii.

(d) *Deaths*

The deaths recorded are total deaths, i.e., including deaths of non-civilians registered in this country, unless otherwise stated. Deaths of non-civilians are not now shown separately. See Note 3 on page vi.

(e) *Populations*

The populations shown for local areas are *home* populations. See Note 2 on page vi.

(f) *New and Revised Tables*

Table 20 has been suspended, and Table 21 has been enlarged to include a cause analysis according to the Registrar General's Abridged List as well as the Supplementary Abridged List. The full details previously shown in Table 20 and also figures (based on the Abridged List, without age detail) for administrative areas not separately shown in Table 21, are available at the General Register Office.

(g) *Usual Residence*

In all tables deaths are classified according to the area of usual residence of the deceased. The definition of usual residence for this purpose was modified in 1953, the main change being that persons dying in hospitals for the chronic sick and in mental and mental deficiency hospitals were in that year regarded as having been resident in the hospital. Such a change with regard to persons dying in accommodation provided under Parts III and IV of the National Assistance Act, 1948, had already been brought into effect during 1952. The method of classification of chronic sick hospitals for this purpose was slightly modified in 1954, and rates for the areas are therefore not comparable with those for 1953.

(h) *Notifications of Infectious Diseases*

Notifications of tuberculosis have for some years been recorded on annual returns submitted by local authorities to the Ministry of Health, and figures have been published in the annual reports of the Chief Medical Officer of the Ministry of Health. In 1954 for the first time weekly and quarterly returns of notifications of infectious diseases sent by Medical Officers of Health to the General Register Office were extended to include tuberculosis notification, and figures derived from the quarterly returns are now included in Tables 29, 32 and 33 of this volume.

\*Manual obtainable from Her Majesty's Stationery Office price 30s. 0d. (30s. 11d. by post).

## 2. Populations

The 1954 estimate of the total population of England and Wales shown in Table 1 includes members of its Armed Forces at home and overseas; it excludes the Armed Forces of the Commonwealth or Foreign Countries temporarily present in the country.

The national and local estimates of home populations (Tables 1, 2 and 12) comprise the resident civilian population, plus any British, Commonwealth or Allied Armed Forces stationed in the area.

## 3. Deaths

The deaths recorded in this volume are those registered in England and Wales. No distinction is made between deaths of civilians and deaths of non-civilians, except where stated for past years in serial tables.

Except in Tables 16 and 23 the deaths recorded are those registered in the calendar period, the time lag between the date of occurrence and the date of registration being usually only a day or two. In Tables 16 and 23 deaths are classified by calendar month of occurrence.

In all tables deaths are classified according to the area of usual residence of the deceased—see also note 1(g).

## 4. Causes of Death

The classification of causes of death is that prescribed in the International Statistical Classification of Diseases, Injuries and Causes of Death, 1948 (Sixth Revision of the International List), operating from the year 1950 in accordance with international agreement. Violent deaths are generally classified according to the External Cause of Injury, but the alternative method of classification by Nature of Injury (N codes) is also used in Tables, 7, 8, 18B, 18C, 19 and 27. The Abridged List used for separate areas in Table 21 is a modification of the International Abbreviated List and was adopted by the Registrar General in consultation with the Ministry of Health; it is extended by the Supplementary Abridged List in the same table. The list used in Table 19 is designed so that it can be condensed into either the International Abbreviated List or the Abridged List of Table 21 (see note at 1(f)). Table 18C employs both of the alternative classifications for violent deaths in the International Intermediate List.

The 1948 International Classification, which has been expanded to cover diseases and injuries as well as causes of death, differs considerably from the previous International Lists not only in scope but also in grouping of causes. In order to provide so far as possible continuity and comparability with past experience the following steps have therefore been taken:—

- (a) The 1949 experience has been completely reclassified according to the 1950 procedure and the revised figures used wherever 1949 references appear in this volume. (The full figures for 1949, based on the new Classification, by sex and age have been published in the Registrar General's Statistical Review of England and Wales for the two years 1948-1949, Text, Medical\*.)
- (b) In the light of the dual classification experience for 1949, and of a limited amount of reclassification undertaken for earlier years, revised figures have been estimated so far as possible for each year 1940-1948, and have been used wherever references to these years appear in this volume. A series of footnotes has been appended to Table 7 explaining any limitations or qualifications attached to these estimates, and they should be borne in mind wherever the relative causes are distinguished in other tables.

Where more than one cause of death is mentioned on the Medical Certificate, the choice of the assigned cause is determined in the main from the statement of the certifier, and not by arbitrary rules of precedence. The practice in this respect is, in effect, the same as in years since 1940, and has now been adopted internationally.

\*Obtainable from Her Majesty's Stationery Office, price 10s. (10s. 5d. by post).

## 5. Death Rates

The death rates for 1950 and on (except Infant Mortality and Maternal Mortality) are derived from the total deaths registered in this country and are based on the home population, while those for 1940-1949 are derived from civilian deaths and populations (*see note 2 on page vi*). All death rates for years prior to 1950 have been revised so far as possible to the new method of classification. Death rates for years 1951 to 1953 shown in this volume are in some cases slightly different from corresponding rates published in the Tables volumes for these years, because the estimated populations on which they are based have been revised in the light of final data from the 1951 census.

The crude death rates for local areas in Table 12 (column 14) may not be comparable one with another for two reasons; the populations on which they are based may have widely differing structures by sex and age and they may include a disproportionate number of invalids where there are certain types of hospital in the area. With a view to eliminating the first, a comparability factor is provided in column 15 of the table for each area, and this, when multiplied by the crude death rate of the area, produces an adjusted rate which may be regarded as allowing roughly for any difference in the population constitution by sex and age of the area from that for England and Wales as a whole. Factors are based on 1951 census figures. For a fuller description of the comparability factor reference should be made to the Statistical Review for the year 1951, Text volume, page 86. The guide to the relative incidence of mortality after taking account of differences in constitutions by sex and age, provided by column 16, does not however take account of any high mortality due to the presence in the area of resident institutions for invalids. In 1953 all deaths in hospitals for the chronic sick and in mental and mental deficiency hospitals were for the first time assigned to the area of the hospital, whether or not the patients had originally been admitted from that area. This practice inflated the death rates for certain areas. (The method of classification of chronic sick hospitals for this purpose was slightly modified in 1954—*see note 1 (g)*). Information about the extent of such inflation can normally be obtained from the Medical Officer of Health for the area concerned.

Infant Mortality rates are based upon the combined births of the associated and preceding year to which they relate, and Maternal Mortality rates upon live and still births occurring in the calendar year, except in the case of deaths from Abortion which are based on the estimated numbers of women aged 15-44. (*See also Note 7 below*).

## 6. Standard Mortality Comparisons

The method of calculating the Comparative Mortality Index was explained in the Appendix to Part 1 of the Registrar General's Statistical Review for 1941. An alternative notation of the formula will be found on page vi of Part 1 of the Review for 1942. This method has been used for the C.M.I's in Tables 3 and 4. In Tables 5 and 9 C.M.I's worked on this basis have been adjusted so far as possible to the new method of classification. A certain amount of estimation is involved in this process of revision, and the resultant C.M.I's can only be regarded as approximate. For this reason they are given to two decimal places only instead of three as in the past.

## 7. Births and Birth Rates

The births recorded are those occurring in the calendar year.

In Table 12 births are allocated to the area of usual residence of the mother. Birth rates in this table have been calculated upon estimates of home populations.

The birth rate areal comparability factors and the ratios of the local adjusted birth rates to the national rate shown in columns 9 and 10 of Table 12 serve a similar purpose to those shown for death rates, as explained in Note 5 above.

## 8. Notification of Infectious Diseases

Tables 29 and 31 and Tables 32 and 33 are based on notifications corrected for subsequent amendments of diagnosis by the Notifying Medical Practitioner or by the Medical Superintendent of the Infectious Diseases Hospital. Non-civilians are included unless otherwise stated.

## 9. Changes in Boundaries.

Areas which have undergone a change of boundary during the year are identified in Table 12 by an asterisk(\*). Statistics for these areas are composite figures combining the "before change" and "after change" positions for the respective periods involved. The population of each area as constituted after the change of boundary will be found in *Appendix B* (page 370). The populations in column 2 of Table 12 are constructed figures, appropriate only for use with the mixed records of births and deaths.

## 10. Significance Indication

Rates based upon less than 20 births or deaths are distinguished by italic type as a warning to the user that the smallness of the experiences may affect their significance.

## 11. Regions

The constitution of the Standard Regions of England and Wales used in this Volume is as follows:—

<b>REGION I.</b> <i>Northern.</i> Cumberland. Durham. Northumberland. Westmorland. Yorkshire, North Riding.	<b>REGION IV.</b> <i>Eastern.</i> Bedfordshire. Cambridgeshire. Ely, Isle of. Essex, Part of <sup>2</sup> Hertfordshire, Part of <sup>3</sup> Huntingdonshire. Norfolk. Suffolk, East. Suffolk, West.	<b>REGION VI.</b> <i>Southern.</i> Berkshire. Buckinghamshire. Dorset. Oxfordshire. Southampton. Wight, Isle of.	<b>Wales II.</b> Anglesey. Caernarvonshire. Cardiganshire. Denbighshire. Flintshire. Merionethshire. Montgomeryshire. Pembrokeshire. Radnorshire.
<b>REGION II.</b> <i>East and West Riding.</i> Yorkshire, East Riding. Yorkshire, West Riding.	<b>REGION V.</b> <i>London and South Eastern.</i> Essex, Part of <sup>4</sup> Hertfordshire, Part of <sup>5</sup> Kent. London Admin. County. Middlesex. Surrey. Sussex, East. Sussex, West.	<b>REGION VII.</b> <i>South Western.</i> Cornwall. Devon. Gloucestershire. Somerset. Wiltshire.	<b>REGION IX.</b> <i>Midland.</i> Herefordshire. Shropshire. Staffordshire. Warwickshire. Worcestershire.
<b>REGION III.</b> <i>North Midland.</i> Derbyshire, Part of <sup>1</sup> Leicestershire. Lincolnshire— Parts of Holland. Parts of Kesteven. Parts of Lindsey. Northamptonshire. Nottinghamshire. Peterborough, Soke of. Rutland.		<b>REGION VIII.</b> <i>Wales I.</i> Brecknockshire. Carmarthenshire. Glamorganshire. Monmouthshire	<b>REGION X.</b> <i>North Western.</i> Cheshire. Derbyshire, Part of. <sup>6</sup> Lancashire.

1. All except Buxton M.B., Glossop M.B., New Mills U.D., Whaley Bridge U.D., and Chapel en le Frith R.D.

2. All except East Ham C.B., West Ham C.B., Chingford M.B., Wanstead and Woodford M.B., Leyton M.B., Walthamstow M.B., Ilford M.B., Barking M.B., Dagenham M.B., Waltham Holy Cross U.D., and Chigwell U.D.

3. All except Barnet U.D., Bushey U.D., Cheshunt U.D., East Barnet U.D., and Elstree R.D.

4. All areas stated in 2 above.

5. All areas stated in 3 above.

6. All areas stated in 1 above.

## 12. Definition of Areas

London=Administrative County of London, which consists of the City of London (including the Inner and Middle Temples) and the Metropolitan Boroughs.

## 13. Conurbations

The conurbation areas used in this volume were agreed by an interdepartmental committee, representing the principal Departments preparing statistics, as a means of securing uniformity and comparability in statistics published by Government Departments in the United Kingdom.

Conurbation is the word used to describe those areas of urban development where a number of separate towns have grown into each other and become linked by such factors as a common industrial or business interest, or a common centre of shopping education, etc. The conurbations each consist of an aggregation of entire local authority areas, and are constituted as follows:—

<i>Durham</i>		<i>Tyneside</i>	<i>Northumberland</i>	
Gateshead C.B.	Felling U.D.	Newcastle upon Tyne C.B.	Longbenton U.D.	
South Shields C.B.	Hebburn U.D.	Tynemouth C.B.	Newburn U.D.

## CORRIGENDA

---

### Statistical Reviews, 1950 and 1951. Tables, Part I, Medical.

Page vi. **Note 2. Populations.**

*Delete* both paragraphs and *substitute* the following :—

The 1950 (1951) estimate of the total population of England and Wales shown in Table 1 includes members of its Armed Forces at home and overseas ; it excludes the Armed Forces of the Commonwealth or Foreign Countries temporarily present in the country.

The national and local estimates of home populations (Tables 1, 2 and 12) comprise the resident civilian population, plus any British Commonwealth or Allied Armed Forces stationed in the area.

† See footnotes on first page of this Table.

**TABLE 4.—Death Rates per 1,000 Living in Age Groups, Infant Mortality and Mortality Ratios, 1841-1954.** } **England and Wales.**

Notes: (a) The Mortality Ratio expresses the all ages mortality of each year (or period) as a ratio to that of the preceding year (or period) after adjustment for sex and age differences in the populations exposed to risk.  
(b) See Explanatory notes on page v.

† Civilian mortality only in 1915-20 and from 3rd September, 1939 to 31st December, 1949, for males, and from 1st June, 1941 to 31st December, 1949, for females.

**TABLE 7.—Deaths by Cause and Sex at All Ages, 1944-1954 — England and Wales.**

(Excluding non-civilian from 1944 to 1949 inclusive).

Note: (i) The following categories of the 1948 International Statistical Classification are not applicable to primary death tabulation and are therefore omitted from this table:—306, 308, 649, 775.

(ii) Although deaths in each year from 1949 inclusive were coded according to the 1948 International Statistical Classification, certain minor changes in coding practice were introduced between 1949 and 1950, and comparability of figures between those years is consequently affected. Categories principally affected are noted accordingly.

(iii) Deaths assigned to any of the following categories as the underlying cause, but where the interval between onset of the disease and death was stated to exceed one year, are, for years 1951 and on, separately distinguished in footnotes, as well as being included in the totals for these categories:—

040-043, 050, 055, 056, 058, 084-087, 100-108.

(iv) See Explanatory notes on page v.

\*\* 144 includes 143 for these years.

§ {162, 163, includes malignant neoplasm of trachea, bronchus, lung, pleura, specified as secondary, from 165, for these years.

\*164 includes remainder of 165 for these years.

\*A minor change in coding practice introduced in 1954 resulted in a transfer of deaths from 163 to 162 in that year.

§ 421.2-421.4 includes 421.0 for these years.

¶ 421.4. From 1950, inquiry was made at all ages (instead of at ages under 45 only) regarding endocarditis and valvular disease of unspecified cause, with the result that considerable numbers were assigned to 414 and some to 450.0.

† 444, 445 includes 447 for these years.

\*\* 443 includes 440, 441 for these years. ¶ 450.0 See note to title of 421.4

\* 434, 440-447, 452. See note ii at head of table. Certain changes in coding practice were also introduced at the beginning of 1952 which resulted in a transfer of deaths in that year from codes (440-443) to codes (444-447).

TABLE 7—continued.

TABLE 8.—Crude death Rates per Million Living from Certain Causes, } England and Wales.  
by Sex at All Ages, 1944-1954.

Note : (1) Rates for years up to 1949 are based on civilian deaths and civilian populations. Rates from 1950 are based on total deaths and Home Populations. See Explanatory notes on page v.  
(2) Footnotes to individual causes in Table 7 apply also to those causes in this table.  
(3) The symbols M, F and P in the second column indicate "Males," "Females" and all "Persons" respectively.

**TABLE 9.—Comparative Mortality Indices (Base Year 1938) by Sex for Certain Causes of Death, 1944-1954.** } England and Wales.

*Notes:* (1) The C.M.I. expresses each cause mortality (all ages) of each year as a ratio to that of 1938 adopted as a base, after adjustment for age differences in the populations exposed to risk. For years prior to 1950, including the base year 1938, mortality has been adjusted to the new (1948) method of classification to eliminate the effects of changing methods of cause assignment through those years. Owing to the degree of estimation thus involved, C.M.I.'s are shown to two decimal places only instead of three as in past years.

(2) For years up to 1949, C.M.I.'s are based on civilian death rates and age distribution.

(3) Footnotes to Table 7 for individual causes apply also to this table.

(4) See Explanatory notes on page v.

**TABLE 10.—Deaths under One Year of Age from } England and Wales.**  
**Certain Causes, 1944-1954.**

*Note:* For years 1944-48 inclusive, deaths and rates classified in this table and in Table 11 according to the 1948 International Statistical Classification have been estimated from available material based on the 1938 International List in the light of experience gained in 1949, when both lists were employed. For those years, therefore, figures must be regarded as approximate.

*See Explanatory notes on page v.*

**TABLE 13.—Deaths by Sex at each Year of Age  
(with Marital Condition), 1954.** } England and Wales.

Included in this Table are 442 cases (191 Males and 251 Females) in which the age of deceased was not definitely stated ; these have been allocated to particular ages in accordance with the best available information and with due regard to the circumstances and cause of death in each case. The deaths of divorced men and women are included with the deaths of widowed.

**TABLE 17.—Causes of Death at Different Age-Periods, 1954, in England and Wales.**

- Notes: (a) Including deaths of non-civilians registered in England and Wales.  
 (b) The sequence of causes of death followed in this table is that of the detailed International Statistical Classification of Diseases, Injuries and Causes of Death (Sixth Revision, 1948), including the classification by External Cause of Injury (E codes) for violent deaths. Each three-digit code is separately specified, except a few which are not applicable to primary death classification, and certain 4th-digit splits of general interest are also shown. Table 18 should be consulted for further details of violent deaths.  
 (c) Separate columns are not devoted to those causes to which, as a rule, few deaths are assigned. In order, however, to make the record complete, the classification numbers of such causes are printed as nearly as possible to the places where they would occur. The deaths, if any, from these causes are shown in footnotes in which the heavy-faced figures preceding the cause express the International Classification number, and the figures following it indicate the sex and age-group of the decedent, roman type for males and italic type for females. Thus **048**, Unspecified forms of dysentery, 5, 45, 75, 80, 20, 85 denotes that four male deaths (one in age group 5—, one in 45—, one in 75— and one in 80—) and two female deaths (one in age-group 20— and one in 85—) are assigned to this cause. A dash (—) indicates that no deaths are assigned.

TABLE 18A—Accidental Poisoning and other Non-Transport Accidents } { England and Wales  
by Place of Occurrence, Age and Sex, 1954.  
(E870-E936)

Note: The deaths in this table have been classified to the several forms of violence in accordance with the information furnished by H.M. Coroners. "Open Verdicts" are included with accidental deaths.

Deaths from poisoning will be analysed periodically in the Text volumes of the Statistical Review to distinguish individual poisons stated to be responsible. These details can be obtained on request from the General Register Office.

See Explanatory notes on page v.

Note.—Epidemic diseases. The deaths assigned in this table to the following categories of the International Statistical Classification include some where the interval between onset of the disease and death was stated to exceed 12 months :— 040-043, 050, 055, 056, 058, 084-087, 100-108.

Where any such deaths occur in this table they are distinguished separately, in brackets and in italics, alongside the figures in which they are included.

TABLE 20.—Suspended.

TABLE 21.—Causes of Death by Sex, 1954, classified in accordance with the Abridged List and Supplementary Abridged List (see statement below). }

Note (1):—Publication of Table 20 has been suspended. Instead, Table 21 has been enlarged to include a cause analysis according to the Abridged List as well as the Supplementary Abridged List, but with no age details. A further cause analysis by detail of age is given for England and Wales, Standard Regions, Conurbations and National Aggregates by type of area in Table 19.

All details which prior to this change appeared in Table 20 and also figures (based on the Abridged List, without age detail) for administrative areas not separately shown in Table 21 are available at the General Registrar Office.

THE ABRIDGED LIST OF CAUSES OF DEATH adopted by the Registrar General in consultation with the Ministry of Health, and its relation to the detailed International Classification.

No.	Registrar General's Abridged List.	Corresponding number in the Detailed International Classification.
1.	Tuberculosis, respiratory ... ..	001-008.
2.	Tuberculosis, other ... ..	010-019.
3.	Syphilitic disease ... ..	020-029.
4.	Diphtheria ... ..	055.*
5.	Whooping cough ... ..	056.*
6.	Meningococcal infections ... ..	057.
7.	Acute poliomyelitis ... ..	080.
8.	Measles ... ..	085.*
9.	Other infective and parasitic diseases ... ..	030-054, 058-074, 081-084, 086-138.*
10.	Malignant neoplasm, stomach ... ..	151.
11.	Malignant neoplasm, lung, bronchus ... ..	162, 163.
12.	Malignant neoplasm, breast ... ..	170.
13.	Malignant neoplasm, uterus ... ..	171-174.
14.	Other malignant and lymphatic neoplasms ... ..	140-150, 152-161, 164, 165, 175-203, 205.
15.	Leukæmia, aleukæmia ... ..	204.
16.	Diabetes ... ..	260.
17.	Vascular lesions of nervous system ... ..	330-334.
18.	Coronary disease, angina ... ..	420.
19.	Hypertension with heart disease ... ..	440-443.
20.	Other heart disease ... ..	410-416, 421-434.
21.	Other circulatory disease ... ..	444-468.
22.	Influenza ... ..	480-483.
23.	Pneumonia ... ..	490-493, 763.
24.	Bronchitis ... ..	500-502.
25.	Other diseases of respiratory system ... ..	470-475, 510-527.
26.	Ulcer of stomach and duodenum ... ..	540, 541.
27.	Gastritis, enteritis and diarrhœa ... ..	543, 571, 572, 764.
28.	Nephritis and nephrosis ... ..	590-594.
29.	Hyperplasia of prostate ... ..	610.
30.	Pregnancy, childbirth, abortion ... ..	640-689.*

{ England and Wales, Standard Regions, Conurbations, London, City of London, Metropolitan  
Boroughs, County Boroughs and Administrative Counties.

Note (2):—*Epidemic diseases*: The deaths assigned in this table to the following categories of the International Statistical Classification include some where the interval between onset of the disease and death was stated to exceed 12 months:— 040-043, 050, 055, 056, 058, 084-087, 100-108. Where any such deaths occur in this table they are distinguished separately, in italicised brackets, alongside the figures in which they are included.

Note (3):—*Maternal deaths*. The deaths assigned in this table to maternal causes (I.S.C. Nos. 640-689) include some where the interval between the maternal condition and death was stated to exceed 12 months. Such deaths are distinguished in footnotes where they occur, as “Delayed” maternal deaths.

\*The London figures include the following notification rates for Puerperal fever alone:— 1944—0.06, 1945—0.06, 1946—0.04, 1947—0.03, 1948—0.01, 1949—Nil, 1950—Nil, 1951—Nil. The Puerperal Pyrexia Regulations 1951, which came into operation on the 1st August, 1951, and which apply throughout England and Wales, including London, contain a revised definition of Puerperal Pyrexia. From the 1st August, 1951, Puerperal Fever was no longer separately notifiable in London.

**TABLE 30.—Seasonal Incidence of Certain Infectious Diseases, 1954 (including Non-Civilians).** } England and Wales.

*Note.*—The actual average weekly number of cases is shown at the foot of each column. The proportion of the notifications to this average taken as 100 is shown for each week : where the seasonal excess is more than 30 per cent. over the weekly average the proportionate figure is shown in heavy type.

*See explanatory notes on page v.*

†Notifications of Tuberculosis have for some years been recorded on annual returns submitted by local authorities to the Ministry of Health and figures have been published in the annual reports of the Chief Medical Officer of the Ministry of Health. In 1954 for the first time, weekly and quarterly returns of notifications of infectious disease sent by medical officers of health to the General Register Office were extended to include tuberculosis notifications, and figures derived from the quarterly returns are now included in Tables 29, 32 and 33 of this volume. They are intended to relate to formal notifications of new cases of tuberculosis, corrected for any revision of diagnosis, but it is known that in some areas certain other cases have also been included, e.g. notifications of cases which have already been notified in the same or another area. Steps have been taken to rectify this for 1955.

The total of 44,041 cases recorded on these returns compares with a total of 42,348 formal primary notifications recorded on the annual returns to the Ministry of Health for 1954.

TABLE 34.--Quarterly Air Temperature  
Rainfall and Sunshine, 1954. } England and Wales.

Note.—The averages used for rainfall and rain-days are for the period 1881-1915, while those for temperature and sunshine are for 1921-1950.

**APPENDIX B.—Changes in Boundaries and Names of Counties, Boroughs, Urban Districts and Rural Districts.**

(i) **Authorities for changes.** (The date of operation in all cases was 1st April, 1954.)

Reference	Ministry of Housing and Local Government Order No.	Description
(a)	H.L.G. 3986	The Dunstable (Extension) Order, 1954. ( <i>S.I. 1954 No. 314</i> )
(b)	H.L.G. 4035	The Chester (Extension) Order, 1954. ( <i>S.I. 1954 No. 317</i> )
(c)	H.L.G. 4198	The County of Chester (Alderley Edge and Wilmslow Urban Districts) Confirmation Order, 1954.
(d)	H.L.G. 4088	The Bridport (Extension) Order, 1954. ( <i>S.I. 1954 No. 315</i> )
(e)		The Gateshead Extension Act, 1953.
(f)	H.L.G. 3981	The County of Essex (Halstead Urban District) Confirmation Order, 1954.
(g)	H.L.G. 4077	The Maidstone (Extension) Order, 1954. ( <i>S.I. 1954 No. 375</i> )
(h)	H.L.G. 4025	The Oldham, Ashton-under-Lyne and Mossley (Extension) Order, 1954. ( <i>S.I. 1954 No. 318</i> )
(i)	H.L.G. 3672	The St. Helens (Extension) Order, 1954. ( <i>S.I. 1954 No. 202</i> )
(j)	H.L.G. 4060	The Warrington (Extension) Order, 1954. ( <i>S.I. 1954 No. 319</i> )
(k)	H.T.G. 3969	The County of Lancaster (Litherland Urban District) Confirmation Order, 1954.
(l)	H.L.G. 3843	County of Leicester (Coalville Urban District) Confirmation Order, 1953.
(m)	H.L.G. 3881	The County of Oxford (Chipping Norton and Witney Rural Districts) Confirmation Order, 1954.
(n)	H.L.G. 4143	The Southampton (Alteration of Boundaries) Order, 1954. ( <i>S.I. 1954 No. 408</i> ).
(o)	H.L.G. 3902	The Guildford (Extension) Order, 1954. ( <i>S.I. 1954 No. 273</i> )
(p)	H.L.G. 4171	The County of Wilts (Melksham Urban District) Confirmation Order, 1954.
(q)	H.L.G. 3857	The New Sarum (Extension) Order, 1954. ( <i>S.I. 1954 No. 316</i> ).
(r)		Dudley Extension Act, 1953.
(s)	H.L.G. 4152	The County of York, West Riding (Bentley with Arksey Urban District and Doncaster Rural District) Confirmation Order, 1954.

## (ii) Particulars of changes

- (a) The names of areas appearing more than once in columns 2 and 3 are marked†.
- (b) Acreage (land and inland water) figures, which are given to the nearest acre, have been supplied by the Ordnance Survey Department.

Reference to Authority	Boroughs, U.Ds. or R.Ds. affected by change		Particulars of areas transferred		
	Area diminished (or extinguished*)	Area enlarged	Name and description (in use prior to change)	Acreage (land & inland water).	Census Population 1951

(s)	Doncaster R.D.†	Bentley with Arksey U.D.†	Part of Sprotbrough C.P.	2	6

†The population of the transferred area was wrongly enumerated at the 1951 Census as if the area already formed part of Alderley Edge U.D.; no adjustment should therefore be made to 1951 Census populations for these two areas as given in the County Report for Cheshire.

NOTE: On 24th May, 1954 the Urban Districts of Harrow (Middlesex), Witley Bay (Northumberland) and Solihull (Warwickshire) were created Municipal Boroughs by Charters of Incorporation.

**APPENDIX B.—continued.**

(iii) Population of areas as constituted after the boundary changes shown in (ii) (Supplementary to Table 12).

Area affected by Change	Census Popu- lation 1951	Estimated Home Popu- lation Mid-1954.	Area affected by Change	Census Popu- lation 1951	Estimated Home Popu- lation Mid-1954.

THE REGISTRAR GENERAL'S DECENNIAL SUPPLEMENT  
ENGLAND AND WALES, 1951

# Occupational Mortality

## PART I

DEATHS IN 1950 IN CERTAIN BROAD GROUPS OF  
OCCUPATIONS RELATED TO POPULATION FIGURES  
DERIVED FROM THE 1951 CENSUS ONE PER CENT  
SAMPLE TABLES

To minimise sampling errors, figures are restricted in the main to the five broad groups of occupations described as "social classes." For some tables however these groups are sub-divided to show, for example, Mineworkers, Clerical workers, Transport workers, and others. Tables include infant mortality rates, stillbirth rates and the mortality of occupied and retired men, and married women.

The volume gives the first official death statistics by occupations since those for the years 1930-32. The figures link men's occupations with the rates at which they, their wives or their children die at various ages and from various causes.

**Price 7s. 6d.**

## STUDIES ON MEDICAL AND POPULATION SUBJECTS

A series of occasional publications designed to provide in convenient form a more extensive treatment of important subjects than is practicable within the limits of the Registrar General's Annual Statistical Review.

No. 1—Regional and Local Differences in Cancer Death Rates, by Percy Stocks, M.D., D.P.H. 1947. 1s. (1s. 2d.)

No. 2—Sickness in the Population of England and Wales in 1944-1947, by Percy Stocks, C.M.G., M.D., F.R.C.P. 1949. 1s. (1s. 2d.)

No. 3—Cancer Registration in England and Wales—an Enquiry into Treatment and its Results, by Percy Stocks, C.M.G., M.D., F.R.C.P. 1950. 2s. (2s. 2d.)

Supplement to No. 3—Cancer Registration in England and Wales—Third year Recovery and Survival rates. 1952. 1s. 3d. (1s. 4½d.)

No. 4—Hospital Morbidity Statistics—A preliminary study of In-patient Discharges, by Donald MacKay, M.A., M.B. 1951. 3s. 6d. (3s. 8d.)

No. 6—External Migration—A study of the available statistics, 1815-1950, by N. H. Carrier, M.A., and J. R. Jeffery. 1953. 8s. 6d. (8s. 11d.)

No. 7—General Practitioners' Records—An analysis of the clinical records of eight practices during the period April 1951 to March 1952, by W. P. D. Logan, M.D., Ph.D. 1953. 8s. 6d. (8s. 9d.)

No. 8—Measurement of Morbidity—A Report of the Statistics Subcommittee of the Registrar General's Advisory Committee on Medical Nomenclature and Statistics. 1954. 1s. 6d. (1s. 7½d.)

No. 9—General Practitioners' Records—in continuation of No. 7. An analysis of the clinical records of nine practices during the period April 1952 to March, 1954. **In preparation.**

PAPERS OF THE ROYAL COMMISSION  
ON POPULATION

Volume VI

TREND AND PATTERN  
OF FERTILITY  
IN  
GREAT BRITAIN

A Report on the Family Census of 1946

By

D. V. GLASS AND E. GREBENIK

Based on an analysis of fertility experience of a 10 per cent sample of the women of Great Britain who, in 1946, were or had been married, this report contains the most comprehensive analysis of fertility that has yet been made.

*Price £3 10s. the set.    By Post £3 11s. 6d.*

# The Registrar General's Statistical Review of England and Wales for the two years 1950-51

## SUPPLEMENT ON HOSPITAL IN-PATIENT STATISTICS

This volume presents a selection of the statistics derived from summary forms of all cases discharged from certain hospitals in 1950 and 1951. The tables show the frequencies of discharges for different diagnoses by sex and age, and demonstrate the extent to which duration of stay for specified diagnoses varies between one group of hospitals and another and according to sex and age. The volume also contains figures showing the sex and age distribution of hospital patients enumerated in each hospital region at the 1951 Census.

*Price 7s. 6d. net.*

*By Post 7s. 9d.*

## SUPPLEMENT ON GENERAL MORBIDITY, CANCER AND MENTAL HEALTH

This volume contains statistics and commentary for the Survey of Sickness, Cancer Registration and Mental Hospitals. The Survey of Sickness data relate to sickness in 1950 and 1951 reported by a sample of the population, and include the frequencies with which different illnesses were reported, whether they required consultation with a doctor and the duration of incapacity caused. The Cancer data relate mainly to the survival after five years of nearly 40,000 cases registered in 1945 and 1946 ; the figures for four important sites of cancer are fully discussed. The data for Mental and Mental Deficiency Hospitals relate to admission and discharges in 1950 and 1951 ; the figures are discussed in relation to diagnosis, region, sex, age, marital status, etc.
